

Made entirely of PTFE, PFA, and PCTFE, the Model F flow meter is excellent for high-purity applications or use with corrosive liquids.

Units are available with a standard valve to monitor and control flow or without a valve to just monitor flow.

Flow meters are individually tested on a Mass Spectrometer Leak Detector and certified to a leak integrity rating of  $1 \times 10^{-7}$  sccs Helium or better.

## design features

- ✓ Chemically inert wetted components.
- ✓ Removable protective shield.
- ✓ Individually leak tested.

### SPECIFICATIONS

<b>SCALES</b>	Direct reading scales for liquids with 1.0 specific gravity.
<b>ACCURACY</b>	$\pm 5\%$ of full scale.
<b>MAXIMUM TEMPERATURE</b>	250 °F (121 °C).
<b>MAXIMUM PRESSURE</b>	100 psig (6.7 bars).
<b>LEAK INTEGRITY</b>	Individually, leak tested and certified to a rating of $1 \times 10^{-7}$ sccs of Helium.

### \*\*MATERIALS OF CONSTRUCTION

<b>TUBE SHIELDS</b>	Polycarbonate.
<b>FLOW TUBES</b>	PFA.
<b>FLOATS</b>	PTFE.
<b>WETTED PARTS</b>	PTFE end fittings. PCTFE guide rods.

*\*\*The selection of materials of construction, is the responsibility of the customer. The company accepts no liability.*
